

PERSONAL STATEMENT

I'm an ambitious software engineer with a strong foundation in full-stack development and Azure DevOps. Beyond my academic and professional achievements, I've actively worked on personal projects that push me to learn new tools, frameworks, and methodologies – which is how I stay ahead of my game.

EXPERIENCE

Software Engineer | Nignite | Apr 2025 - Present

Refining my software engineering skills daily through following industry standards in full-stack development and Azure DevOps administration and development.

Application Engineer Internship | Nignite | Mar 2025 – Apr 2025

Developed a full-stack application using React, .NET and PostgreSQL.

Salesforce Developer Internship | Intermino.com Novi Sad | Mar 2024 - May 2024

Worked extensively with APEX, a Java-based language. The main focus of my experience was on automating business processes.

STUDENT PROJECTS

Pet Shop – using Angular 19, Spring Boot 3, MySQL Dec 2024

A scalable flagship project I developed using the modern Angular 19 for the frontend, Spring for the backend and MySQL. Also includes Rasa AI chatbot. Git: [Frontend](#), [Backend](#)

Snake game – using functional programming principles + Supabase

Used modular systems to implement game logic to efficiently access the online database, all through functional paradigm. Available on [GitHub](#) and Vercel on: <https://zmijica.vercel.app>

EDUCATION

Bachelor of Software and Information Engineering | Singidunum University | 2021 – 2025

Certificates: - **IBM: Essentials of Rational Software Architect**

- **Red Hat: RH124 – Red Hat System Administration I**

- Proficient in C#, Java, TypeScript, Python. I can apply **software modeling** techniques to design and visualize complex software systems. Managed software projects, including software design and software architecture, project planning and team collaboration.
